

## **CaoSys Introduces CS\*Applications for Oracle E-Business Suite Release 12**

11th October 2008

CaoSys, a developer of Governance, Risk, Compliance (GRC) and Productivity software announced this week the availability of CS\*Applications for Oracle E-Business Suite Release 12.

CS\*Applications offers a number of diverse solutions ranging from its Segregation of Duties solution (CS\*Comply) to its flagship application builder tool (CS\*Form) with a number of other solutions in between. The suite consists of several different solutions, each built specifically for and completely integrated into Oracle E-Business Suite.

"This new release of CS\*Applications demonstrates that we are positioned for the uptake of organizations moving to Release 12 over the coming months and years as well as ensuring those on earlier versions have full upgrade protection." said CaoSys CEO, Craig O'Neill. "CaoSys continues to enable organizations to maximize their investment in Oracle's enterprise applications by drastically reducing the costs associated with and time needed to augment and extend their systems whilst ensuring the burden on scarce and expensive IT resource is also reduced."

CaoSys offers several solutions that fall into two distinct market segments, compliance and productivity. The companies compliance based solutions, CS\*Audit, CS\*Comply and CS\*Secure enable organizations to implement data auditing, segregation of duties (SOD) internal controls and data security based controls. Their productivity based solutions, CS\*Form, CS\*Rapport and CS\*Enquire cater for several needs such as onscreen interactive reporting, application extensions, application building and ad-hoc querying to name but a few. CaoSys classifies CS\*Form as a new breed of RAD tool that it refers to as Extreme-RAD (xRAD). Another solution named CS\*Accelerate is a cross-over solution that offers both compliance capabilities in the form of application based controls as well as productivity based benefits such as screen augmentation and navigational enhancements.

"Our solutions resolve many issues that users of the Oracle E-Business Suite face on a daily basis. We bring a whole host of benefits in a very cost efficient way and at the end of the day save organizations time and money. No other vendor in this market can compete with us on cost of ownership or return on investment, our solutions are so cost effective that ROI can often be measured in a matter of weeks,

sometimes just days." continued O'Neill. "All of our solutions can be put to work within minutes and all require very little technical know-how to use, implementing solutions that typically take weeks or months to develop can now be achieved in a fraction of the time."

CS\*Applications for Oracle E-Business Suite R12 and 11i is available now. More information including evaluation editions of the software is available directly from the CaoSys website at [www.caosys.com](http://www.caosys.com).

### **About CaoSys**

CaoSys is an independent software solution provider within the GRC and productivity software space. Its solutions offer radically different ways of implementing solutions for the Oracle E-Business Suite that save time and money. Their solutions provide all the main disciplines for a comprehensive GRC solution, from traditional conflict based segregation of duties to high risk single function security to masking and hiding sensitive data to application configuration to powerful data auditing as well as a host of very powerful productivity tools. CaoSys software helps businesses streamline and secure their applications making their users and therefore their business more efficient whilst ensuring assurance and accountability. CaoSys was formed during 1999 and is based in the UK. Visit CaoSys online at [www.caosys.com](http://www.caosys.com) or email [info@caosys.com](mailto:info@caosys.com).
